

# RESUME

**Kaan ÇELİKTAŞ**

I have been trying to train myself in the field of web development for about 3 years. During this process, I had the chance to develop my competencies by working in different teams and companies. Apart from my competence in front-end web development, I also had the opportunity to work in project management and design. Apart from these, I am currently working to improve myself in back-end services. After many start-up projects, I want to see myself in a more corporate and larger team. While all this is happening, I want to increase my experience by working with senior developers where I can get quick answers to the problems I encounter.

**Personal Details:**

Phone Number: +90 535 015 00 01

Mail: kaan.celiktas@yahoo.com

| 10/2021 – 07/2022   | Project Manager and Social Media Coordinator | LojistikçilerinSesi |

## Projects:

## Description:

### Happy IT

**From** 01/2023  
**Until** Continues

**Customer:** Happy IT

**Function:** Front-End Web Developer and UI Designer

**Tasks/  
Activities:** I had the opportunity to take part in various jobs in this company, which I have just started and where I am continuing my internship. The first of these was about the subject of my interest, namely, preparing a website. Another was the design and creation part, where I am currently a content producer for logos and social media.

**System  
Environment:** PHP Admins, Wordpress, Atlassian (Trello), Zoom, HTML5, CSS3, Figma, Office Programs, Google Drive

### Sign2Future Web Site Renew

**From** 10/2021  
**Until** 01/2023

**Customer:** Dincer Logistics, Flo

**Function:** Front-End Web Developer and UI Designer

**Tasks/  
Activities:** Since November 2021, I have been doing website front-end studies and designs with the Sign2Future team. In addition, when I was preparing code for the new UI, I was working on responsiveness for phones, tablets, different laptop sizes, etc. . In this process, I also took part in the editing, re-creation, and design stages. So, I used Figma Environment to create and design new pages. In this way, I improved one of my skills too. Apart from these, this project's main motto is using gamification and sustainability, that's why on the one hand I got some extra courses from Udemy to adapt myself to this project easily, on the other hand, I was creating designs, and developing based on these features. After the deployment, again I had a chance to talk

## Projects:

## Description:

with experts who is in this sector and improved the design by virtue of these meetings. Also, while this project was developing, we used agile methodology and the Atlassian Trello tool to follow and develop with sprints. Because of our project manager had some problems, I had a chance to experience, project manager status for a while, in this process I was coordinating the web development side, social media side, client meetings, and weekly general team meetings.

**System Environment:** MySQL Services, Atlassian (Trello), Zoom, C#, .NET, Angular, JSON, NodeJS, ExpressJS, React, Vue, FullStack, HTML5, CSS3, JavaScript, Bootstrap, Figma, Office Programs, Microservices, GIT, Google Drive

## Lojistikçilerin Sesi

**From** 10/2021  
**Until** 07/2022

**Customer:** Lojistikçilerin Sesi

**Function:** Project Manager and Social Media Coordinator

**Tasks/Activities:** September 2021- July 2022 I prepared designs and articles as a project manager in LojistikçilerinSesi and DepoDer team. Externally, I organized live broadcasts with software companies in the logistics sector. Also, I prepared some of these articles by interviewing managers from the software industry. In this way, I improved my language skills too. In the designing part, I used Canva Website Application for social media and Adobe Photoshop with Figma Environment for the website updates.

**System Environment:** Canva, Zoom, Figma, Google Meeting, Office Programs, Adobe Photoshop
